About The Project

Ease explanation about games & metaverse idea

What are we working on?

Elevate with In-Game AI

These intelligent entities evolve alongside you, crafting narratives that adapt to your choices, creating a tapestry of experiences that evolve with your imagination.

Unveil Your Epic

Imagine a universe where AI-driven personas come to life, where shared quests and adventures become the fabric of reality.

Seamless Integration

Powered by Unreal Engine 5, engage with the metaverse through web3, allowing you to directly connect with the Ethereum blockchain, owning and trading in-game assets with true value using NFT.

Beyond Gaming

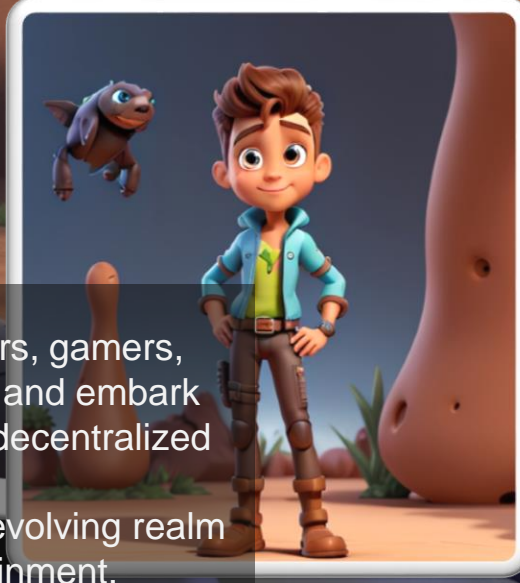

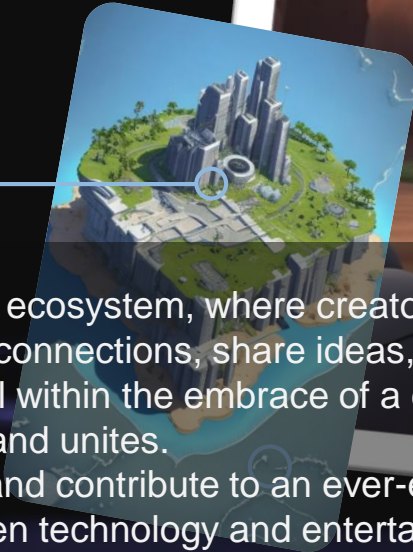

Step into the metaverse

- host meetings that transcend reality
- gather for concerts that reach new heights of virtual immersion
- and connect in ways previously unimagined

Collaborative Virtual Haven

AI MetaGames is a thriving ecosystem, where creators, gamers, and explorers unite. Forge connections, share ideas, and embark on collective adventures, all within the embrace of a decentralized metaverse that empowers and unites. Build worlds, define rules, and contribute to an ever-evolving realm that bridges the gap between technology and entertainment.

Games Economic

Introduction: The Prosperity Nexus
Bridging Virtual Adventures with Real-World Value

Games Economic Concept

Welcome to the forefront of innovation, where immersive gaming and tangible prosperity converge within the AI MetaGames metaverse. This whitepaper outlines a groundbreaking concept, the Prosperity Nexus, designed to revolutionize the way players engage, interact, and thrive within our virtual realm. Inspired by the principle "where there is money, there's people," the Prosperity Nexus is a dynamic economic ecosystem that attracts, rewards, and empowers players in a truly novel way.

The 6 Components: Empowering Players, Empowering Prosperity

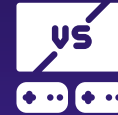

#1 Participatory Yield (PY): The Heartbeat of Engagement

Participatory Yield (PY) is the cornerstone of the Prosperity Nexus. Players are rewarded with additional \$AIM tokens based on their active engagement. Completing quests, events, and contributing to the metaverse's growth all contribute to a thriving PY ecosystem.

#2 \$AIM Stakes: Power in the Players' Hands

The metaverse's destiny rests in the hands of the players. \$AIM Stakes enable users to lock up their \$AIM tokens, granting them voting power in governance decisions that shape the metaverse's evolution, mechanics, and economic policies.

#3 Dynamic Events: Igniting Competitiveness

Engage players through regularly hosted dynamic in-game events that offer generous \$AIM rewards. These challenges foster friendly competition, showcase player skills, and amplify the excitement of the metaverse.

The 6 Components: Empowering Players, Empowering Prosperity

#4 Player-Created Content: NFTs as Premiums

Our community's creativity is celebrated and rewarded. Outstanding creations within the metaverse can be immortalized as non-fungible tokens (NFTs), granting creators unique benefits, access to exclusive areas, and a share in future metaverse profits.

#5 Metaverse Staking Vaults: Amplifying Returns

Metaverse Staking Vaults offer an avenue for players to lock up their \$AIM tokens for a defined period, yielding boosted rewards. These vaults enhance token scarcity, potentially leading to increased \$AIM value.

#6 NFT Official Release and Trading: Empowering Player Ownership

All MetaGames introduces an official NFT release of in-game objects, enabling players to truly own their virtual possessions. These NFTs can be freely traded among players, adding an additional layer of value and ownership within the metaverse.

The Impact: Pioneering a New Era of Engagement

The Prosperity Nexus isn't just about economics

it's about redefining the very essence of engagement. Players no longer simply play; they thrive. By blurring the lines between virtual and real, AI MetaGames creates an environment where players become stakeholders in their adventures, their metaverse, and their prosperity.

Incorporate the Prosperity Nexus into your gaming experience. Join us as we transcend virtual boundaries and ignite a movement where engagement and prosperity intertwine. Together, let's forge the future—a future where gaming isn't just an escape, but a reality of prosperity and possibilities within AI MetaGames.

03

AI MetaGames Business Model: Empowering Engagement, Fostering Prosperity

The Prosperity Nexus

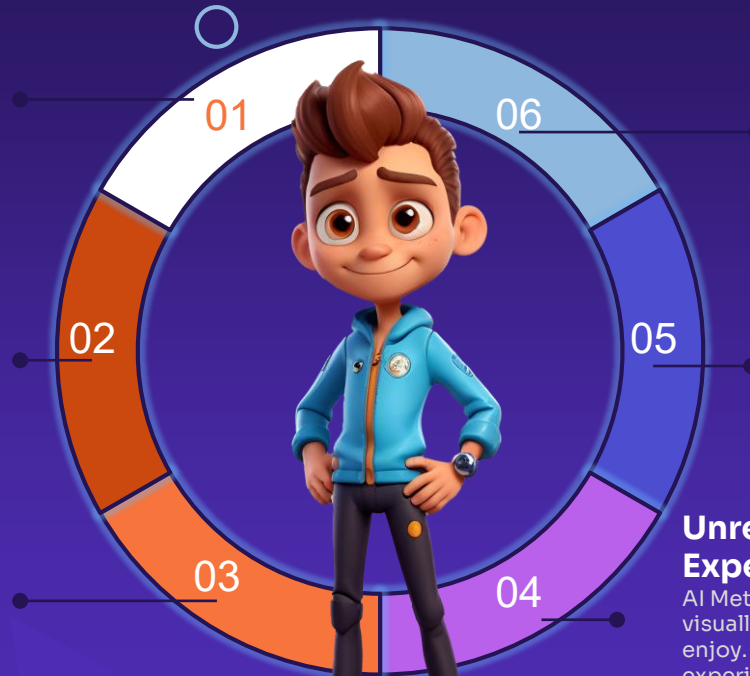

Through Participatory Yield (PY), \$AIM Stakes, dynamic events, and player-created content, we've created a cycle that rewards your engagement.

Metaverse Economy and \$AIM

\$AIM facilitates transactions, powers interactions, and serves as the conduit through which players can harness the true value of their virtual experiences

Governance and Impact

Your voice matters in shaping the future of AI MetaGames. \$AIM Stakes grant you voting power in governance decisions, allowing you to influence the metaverse's trajectory, mechanics, and economic policies. We believe that by involving you in the decision-making process, we can build a metaverse that truly resonates with the community.

NFT Ownership and Trading

By introducing official NFT releases of in-game objects, we empower you with true ownership of your virtual possessions. These NFTs can be freely traded, establishing a thriving marketplace where your virtual achievements can be shared, bought, and sold among the community.

Seamless In-Game Conversion

To ensure flexibility and ease of use, we've implemented a system that enables you to convert in-game coins to \$AIM. This integration bridges the virtual world with the broader metaverse economy, offering you a seamless transition between various in-game interactions and the broader AI MetaGames ecosystem.

Unreal Engine 5 and Dynamic Experiences

AI MetaGames is powered by Unreal Engine 5, offering visually stunning, immersive worlds for you to explore and enjoy. Dynamic events, quests, and challenges keep the experience fresh, engaging, and filled with opportunities to earn \$AIM tokens

06 Roadmap

As possible as we and you can do...note that this roadmap can be changed during time as the project's progressing.

Early Stage

- Logo & Socials
- Team Building
- Whitepaper
- Website
- Metaverse Environment Prototype
- Teaser For Marketing
- Private Sale 5%
- Pre-Launch Marketing
- Sponsors & Partnership Building

Launch

- Presale at Pinksale (ERC/ETH)
- Launch on Uniswap

Entry Stage

- After Launch Marketing
- Token Staking Platform Started
- NFT Creation Started
- NFT Marketplace Platform Started
- CMC & CG Applied
- Dextools & Others Platform Listing
- Etherscan Verification Applied
- Multi-Chain Bridge
- Pre-Alpha Metaverse Project Started
- Web3 Games Launchpad Started
- CEX Listing Applied
- Next Stage Is Loading.....
