customers use their credit card

to purchase XOX tokens

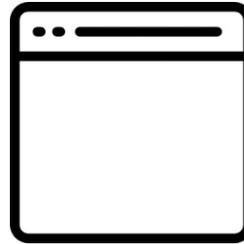

which is used to tip performers

customers use their credit card to

to purchase XOX tokens

which is used to subscribe to virtual reality content

The XOX Token is an ER-C20 based token smart contract which will be available for sale on an ADULT CAM SITE and for SUBSCRIPTION BASED VR content.

A new digital currency

For a cryptocurrency to be viable it must be useful and valuable. Which is why XOX Tokens are available within our platforms where users are purchasing tokens to tip performers and view virtual reality content.

XOX is a token issued with an Ethereum smart contract, 60 million will be minted for the ICO. There will be no further tokens created after completion of this phase of the project and all undistributed tokens will be burned.

XOX can be held in our own wallet or ERC20 compatible Ethereum wallets such as myetherwallet or mist.

TOKENS OVERVIEW

XOX will produce a finite 1,000,000,000 tokens, and no further tokens will be produced.

- 60 million will be offered in the ICO token sale to assist with marketing and staffing cost.
- 100 million will be held in the company's reserves.
- 840 million will be available only to customers through the camsite and subscription portals. ***(thanks to the smart contract these tokens are not even accessible to the company's founders)***

The public ICO will begin on the 11th of July and will last for 28 days.

\$1USD = 10 XOX Tokens

1 XOX token = .10 cents

All contributions of 10 ETH or more will receive a 40% extra allocation.

All tokens will be issued to your Ethereum address instantly upon contribution through the ICO.

To load your tokens in to your private Ethereum wallet please use the following information:

Token contract address: `0x4b59f41b8488b09dcac1ddd033634f3db59cbe21`

Token name: **XOX**

Decimals: **18**

Building fundamental value

XOX will build fundamental value for the new currency by integrating into platforms. XOX will sit at the centre of a new digital economy, driving demand and fundamental value for the cryptocurrency.

Purpose and characterization

XOX is introducing an open source cryptographic token, named XOX, which is envisioned as a

General purpose cryptocurrency for use in everyday digital services such as chat, social media, and payments.

XOX will be the unit of account for all economic transactions within the XOX Ecosystem, and it will serve as the basis of interoperability with other digital services.

In character, XOX is a pure cryptocurrency of fixed supply. It is fractionally divisible and long term non inflationary.

Like other cryptocurrencies, units of XOX are fungible and transferable, and they will be expected to trade on cryptocurrency exchange

Implementation: Ethereum and ERC20

XOX will be implemented on the public Ethereum blockchain as an ERC20 token.

The Ethereum blockchain is currently the industry standard for issuing custom digital assets and smart contracts.

The ERC20 token interface allows for the deployment of a standard token that is compatible with the existing infrastructure of the Ethereum ecosystem, such as development tools, wallets, and exchanges.

Ethereum's ability to deploy Turing complete trustless smart contracts enables complex issuance rules for cryptocurrencies, digital financial contracts, and automated incentive structures.

SMART CONTRACTS

The XOX token is accompanied by a group of SMART CONTRACTS deployed as a layer of DAPPS written in Solidity using EVM (Ethereum virtual machine) bytecode. Dapps will be implemented using the Truffle Dapps Framework and will be stored statically

1. Implement ERC20 token standard in smart contract
2. XOX token buyers will transfer respective amount of ether to smart-contract address
3. The smart contract on acceptance of the ether transfers respective amount of token to the XOX token purchaser
4. The transfer function of ERC20 standards is used in our contract to transfer respective amount of tokens for that particular ether received at the smart contract address
5. A XOX token holder can transfer his/her token to another address through the transfer function in the contract

How the raised capital will be spent?

- Marketing & Business development
- Live operations
- Software development
- Virtual Reality Content
- Legal Expenses

ROADMAP

AUGUST 11
SEPTEMBER 1
NOVEMBER 1
DECEMBER 1

ICO Complete
LIST ON EXCHANGES
RELEASE VIRTUAL REALITY SCENES
RELEASE XOX CAM SITE

XOX Founding Team

Michael Anthony- Co-founder.
HEAD OF OPERATIONS

Michael has a strong digital marketing background and manages the team from Sydney, Australia.

Xander Porn - Co-founder
CONTENT DIRECTOR

Xander is one of the top directors/producers in Los Angeles.

Nathan Griffin
VIRTUAL REALITY DEVELOPER

Nathan is a computer scientist specialising in Virtual Reality development

Alberto M
BACK-END WEB DEVELOPER

Alberto is a video streaming expert.

CONCLUSION

Instead of selling customers traditional VIRTUAL CREDITS, we are selling them an XOX Token creating demand for the cryptocurrency.

We hope you can be part of this journey with us.

ICO Smart Contract Information

ICO stages: 2

Duration: 49 days

Total amount of tokens to be sold: 60,000,000 XOX (\$6,000,000 US)

Reserved amount of tokens: 100,000,000 XOX (\$10,000,000 US)

Amount of tokens to be sold by Post-ICO: 840,000,000 XOX

Token price (rate): Price changes during ICO

1 XOX = 0.1 USD

1 USD = 10 XOX

Important note:

ICO Smart Contract is working only with ETH

Automatic rate change: Yes

Token Smart Contract will automatically change the price of XOX depending on the current rate of ETH to USD.

Refund terms: Automatically in case ICO is gone fail

Bounty Program: No

Withdrawal terms: Automatically after each investment

Success terms:

Min Cap/Soft Cap: 1,000,000 XOX (\$100,000 US)

Hard Cap: 60,000,000 XOX (\$6,000,000 US)

End terms: Automatically after duration period or in case all tokens are sold out

Pre-ICO Stage

Duration: 21 days

Amount of tokens to be sold: 6,000,000 XOX (\$600,000 US)

Minimum investment: 1 ETH

Bonuses: Pre-sale, Volume-based

Pre-sale Bonus: 40% for less than 10 ETH

Volume-based: 60% for 10 ETH or more

ICO Stage

Duration: 28 days

Amount of tokens to be sold: 54,000,000 XOX (\$5,400,000 US)

Minimum investment: 0.5 ETH

Bonuses: Volume-based

Volume-based: 40% for 10 ETH or more
