## 1. Concept Tronbaba

A combined multi Tier Decentralized E-commerce platform combining all types of buying and selling, for the general public or importers & Exporters. for creating single adds, owning your own online shop, selling your services, bulk selling & buying and benefiting from a pool buying system

1: Online Shop creation with ability to buy and sell in bulk to and from the buying pool(s), sell to both Bronze or Silver members, comes with full SEO for all items being sold (Gold Account)

2: Advertisement creation, able to buy from a buying pool Account (Silver Account)

3: Advertisement creation, can sell to any members But has no buyer pool rights (Bronze Account)

4: All Accounts are set up by registering & filling out a (KYC) Know your Customer form and sending the correct Photo ID Passport or Driving license and a copy of a Utility Bill. We intend to keep our customers safe, and none of this information is used by or sold to third parties, nor any of the information taken in KYC registration is stored on the Internet. Information Taken for the purpose of the ICO is destroyed when the ICO is completed.

5: Wallet services will be created and offered to all Tronbaba buyers and sellers to store their Digital Tokens, the Tronbaba Wallet will be developed to allow sending or receiving Tronbaba BBT a unique address, and passphrase.

6: Dispute system, to resolve issues such as returning damaged goods, Items not delivered, and complaints.

7: A smart contract Safety wallet will be developed using the Block-Chain, this holds a buyers Tokens for a 24 Hours period after goods have been delivered. This allows a buyer to examine the item(s) for any damaged or any other complaint relating to the goods received. The wallet is a free service for any buyer and is used on every sale to prevent fraudulent or

Bogus Sellers. If a dispute is raised within the 24 hour period after receiving goods the tokens are locked until the Tronbaba team investigates the dispute.

8: Rewards for high Standards for both Seller and buyer rankings with issuance of the TronbabaToken with an exchange rate of 10:1

9: Lower Shipping and Freight services using Trobaba SA, FA & Courier Services. By using Tronbaba own shipping services being paid in Tronbaba Tokens all shipping is controlled and tracked by our own system from label printing to delivery. Tronbaba SA and FA uptake will be by new and existing shipping, Freight and courier companies.

## 2. Network Architecture

3 main cluster Raid Servers running 5 hot swap Drives

2 Cluster Mail Raid Servers running 5 hot swap Drives

2 Cluster Database Raid Servers running 5 hot swap drives

2 Cluster Master node Raid Servers Running 5 Hot Swap Drives

2 integral Firewalled internet Gateways

2 Cisco Routers

14 workstations

8 networked Label Printers

200 Label Scanners

11 APC UPS battery power Supplies to protect server down time

2 Server Racks

Air Conditioning for Server Room

(Central hub) the Central hub will consist of 14 offices, warehouse, Delivery and collection point, vehicle parking.

5 high top courier Vans, 2 7.5 Ton Cargo Trucks, 2 HGV 40 ton Freight

Trucks Building and contents insurance

### 3. Account types

#### **Bronze:**

A free to use option, by opening a Bronze Account a seller can sell or Buy new or used item(s), the account is generalized for the home user. The bronze account will not have the facilities of a Gold or Silver account, only a 2% Token transaction fee is charged when an item is sold. Goods shipped globally will be able to use Tronbaba Shipping service (TSS)

#### **Silver:**

Annual Subscription fee, A Silver account has the same rights as a Bronze Account and able to sell items but can also buy from Gold accounts using the buying pool. Label Printing for sales & Tronbaba Shipping Service (TSS) to send goods Globally or locally. When buying from a pool a silver account holder will pay a 1% transaction charge. When making any sales a 2% transaction is charged. With an Annual fee of 1,500 (Tronbaba Tokens)

#### **Gold:**

Unique Annual Account able to create their own shop placing 1 – 100 products, Gold Account holders can also buy and sell through the buying pool. Only a 2% transaction fee is charged on sold items. Gold members can use the Tronbaba Shipping Service (TSS) for purchases or sales with label printing on a per lot basis when selling using the buying pool. Annual Account fee 3,000 Tronbaba Tokens

#### **Platinum:**

With this account a member can place up to 500 items in their own online shop, buy or sell to a Buying pool, list items in the bronze tier, has access to both (LCL) Lesser Container Load or (FCL) Full Container Load Tronbaba Shipping Services, Label Services, free banner shop advert, a reduced 1.5% per transaction fee. Annual Account fee is 4,000 Tronbaba Tokens

**Services:**

Offer Time & Labor services from trade(s) such as construction, Technology Specialists, Education, and many more. A seller can offer his/her services to the general public for a Daily or hourly fee, with the ability to mark days or hours not free using an integrated Calendar. A buyer wanting to use a member services selects from the sellers booking calendar and the time required. Payment is held in a secure wallet and released 24 hours later. A fully automated invoice system with sellers and buyer details, & linked feedback to both buyer and seller. Insertion fee 10 Tronbaba Tokens.

## 4: (SA) (FA) Shipping Activation

This service is Used by all members of the Tronbaba Shipping Services:

To be fully Decentralized Tronbaba Development team will make shipping items both local and Global 100% Decentralized Using Block-Chain. To achieve this Tronbaba will Deploy Shipping Agents from many countries, Every Buyer or Seller on our site will require at least one Agent in their country. There will be 4 types of Agents that can take part, Shipping Agent, Freight Agent, Couriers & Drop Shop Agent. Members can be an existing Company or new startups. The bespoke Software will match a collection to the nearest Delivering Agent, if the item(s) being sent is to an overseas address, it will be labeled to the destination Agent. Customs Duty collection is triggered when the destination Freight Agent or Shipping Agent completes the customs clearance, by entering the details in to the interface. This triggers a fee for Duty Charges to the Buyer sent by SMS and Email. When Customs duty is paid to the destination Agent, items are then given the green light to Deliver. This procedure is also part of the tracking system and when duty Is Marked as Paid the Tracking is updated accordingly. All Required Documents related to each sale for either import or export Shipped or Air freight will be through the Interface and Block chain driven.

**(SA) & (FA) Shipping, Freight Agents, Couriers, and Drop Shops:****Explanation of a Shipping Agent:****Membership: Fee 6,000 Tronbaba Tokens**

## **2% Transaction Fee**

A shipping agent handles larger sized orders that are being shipped from one country to another through the use of a Cargo ship, in the format of a container or pallet. Container Shipping can be LCL (less than a container load) usually a shared container, FCL (full container) or a pallet to a destination country. A shipping Agents responsibility is Documentation, Insurance of goods if required, Port to port, Securing space, Loading, and many other tasks.

Shipping Agents will use the interface to add their Main port of origin, port's shipped to, & selection of prices for each port dependent on shipment type, Customs Duty Codes, and any other information needed to fulfill the requirements of a destination port. The most cost effective Freight Agent in a receiving country will be automatically selected by the interface.

Any buyer shipping one Pallet or above, Sharing a container, or using a full container, will be offered the most cost effective price taken from the data submitted by the participating Shipping & Freight Agents and offered to the buyer on a purchase. If the buyer selects to use the Services, labels are created, which in turn triggers the collection or awaits delivery to the Participating Agent. Each leg of the journey will be scanned and used for tracking, goods received by the Shipping Agent, goods on Board, goods Arrived at Destination country, Customs collection, out for Delivery, goods Received.

## **Explanation of (Air) or (Ground) Freight Agent:**

**Membership: Fee 5,000 Tronbaba tokens**

## **2% Transaction Fee**

A Freight Agent also known as a Freight Forwarder handles goods at a destination port, clears & collects customs duty, and delivers goods. Freight Agents will handle all goods sent to the destination country from a Shipping Agent, Freight Agents do not handle anything smaller than 1 pallet. Freight Agents will have access to the interface to add ports of collection, cities of delivery with-in their country and required working Area, Pallet sizes & weights, this will include prices of moving Pallet's, or Container(s) to a destination City of their KYC Registered country.

Agents closest to a port than other participating Freight Agents, are not Guaranteed the work but can be based on price alone to offer a better deal to importers or exporters. This creates competition, and ensures the best possible deal for the buyer.

### **Explanation of a Courier:**

#### **Membership: Fee 4,000 Tronbaba Tokens**

#### **2% Per Transaction Fee**

Courier's handle goods local or international, mainly through air cargo & only cover up to a Pallet size. Some Couriers can also clear Customs and collect any Duty from a buyer when receiving goods through Air Cargo prior to delivery. Air Cargo is moved around by international Airlines or private airlines owned by couriers such as DHL, UPS, Fedex, & Tronbaba.

Tronbaba will secure Air Cargo space through partnering with international & European Airlines, creating Parcel hubs in several areas in every country allowing a smooth flow of parcels being delivered to any destination local or globally and on the Block chain.

Couriers can deliver goods to Shipping Agent from a single parcel, and up to 1-3 Metric ton pallets. The option to create a hub base and Drop Shop, to allow a sender to drop the parcel to the hub.

The most cost effective prices for a delivery will be shown automatically on each item for sale, taken from information the courier has entered in to the interface.

### **Explanation of a Drop Shop:**

#### **Membership: Fee 200 Tronbaba Tokens**

#### **Linked to a scan for tokens system**

Drop Shops

newsagents, Shop keepers, late stores, fuel stations, Supermarket's all applications considered. A Drop Shop agent is responsible for scanning items sent by a seller/sender from either the Tronbaba Platform or from other web sites offering Tronbaba Shipping and Postal Services. All items taken to

Drops Shops will not exceed a maximum weight of 25kg, items are scanned on arrival in turn automatically updates the tracking, and shows the Drop Shop Location.

Each Item Scanned by a Drop Shop Agent will earn tokens that can be exchanged for goods using the Tronbaba Platform, saved in your Tronbaba Wallet, or sent to a Digital exchange and traded for other Digital Currencies.

## **5: Buying Pool**

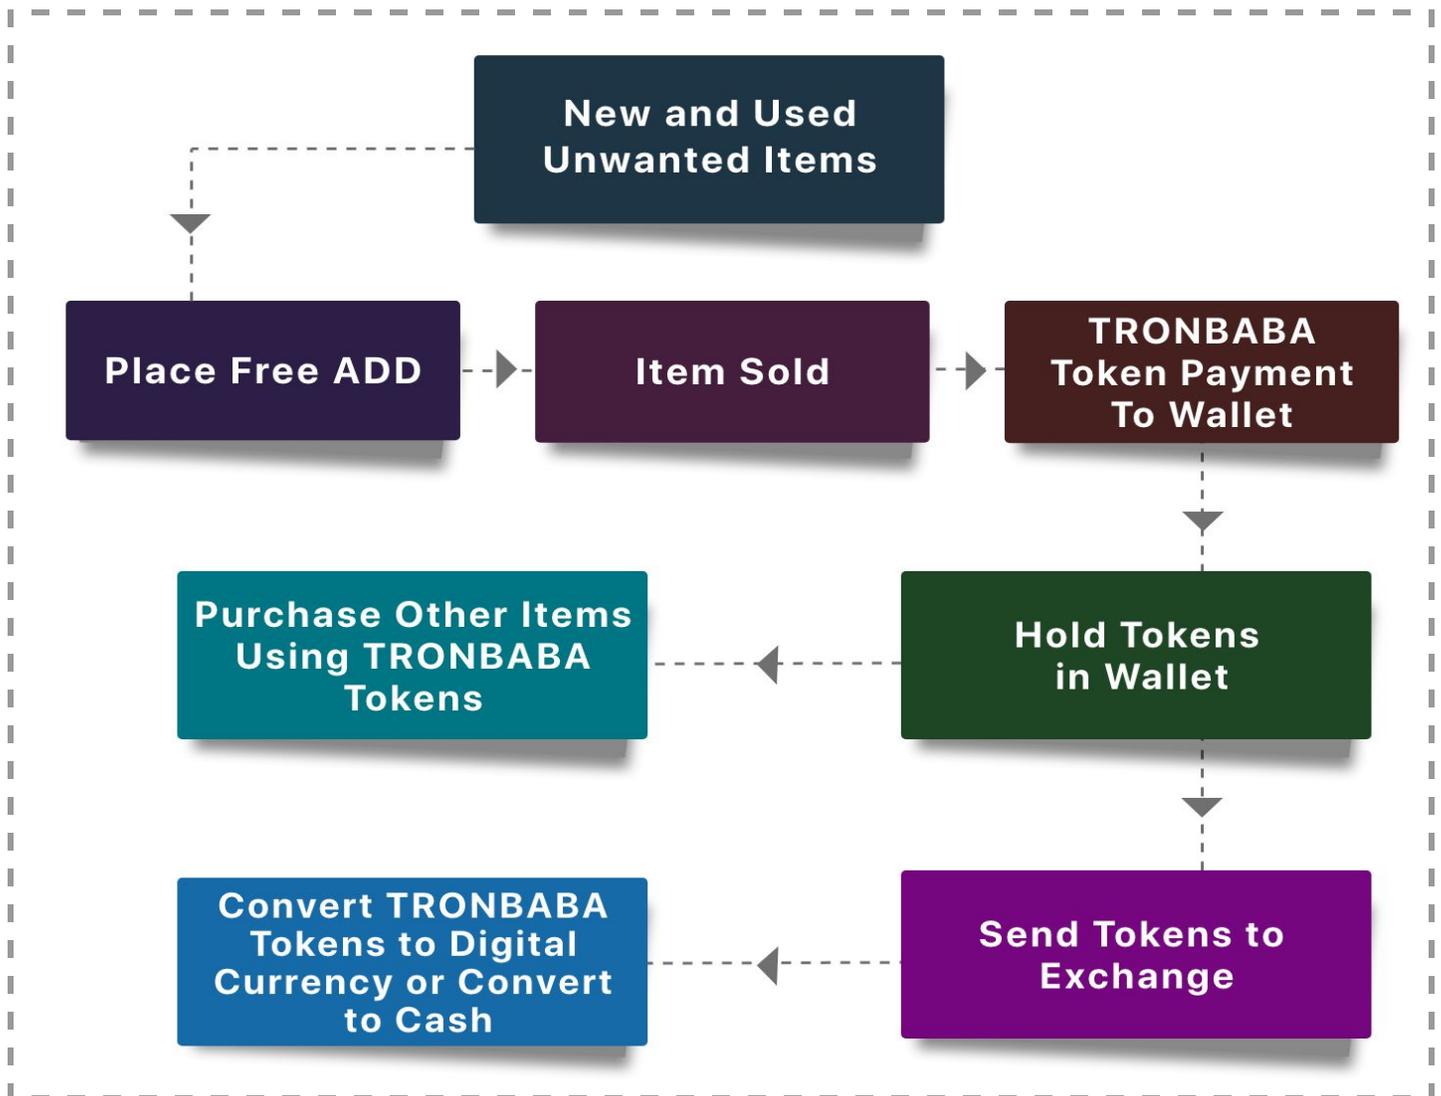

Small Businesses & Business startups can now benefit from using a buying pool to ship in smaller quantities of goods from worldwide destinations at an equal price to that of buying a larger quantity. Combined resources from Tronbaba Shipping Agents (SA) and Freight Agents (FA) help to lower the cost of Global Shipping to benefit buyers of all sizes. With the use of Nodes running the Tronbaba Block-Chain Shipping will be easier, quicker & cost effective passing on benefits to all buyers & Sellers using the Tronbaba platform and Block-Chain.

## **6: Tronbaba Fork**

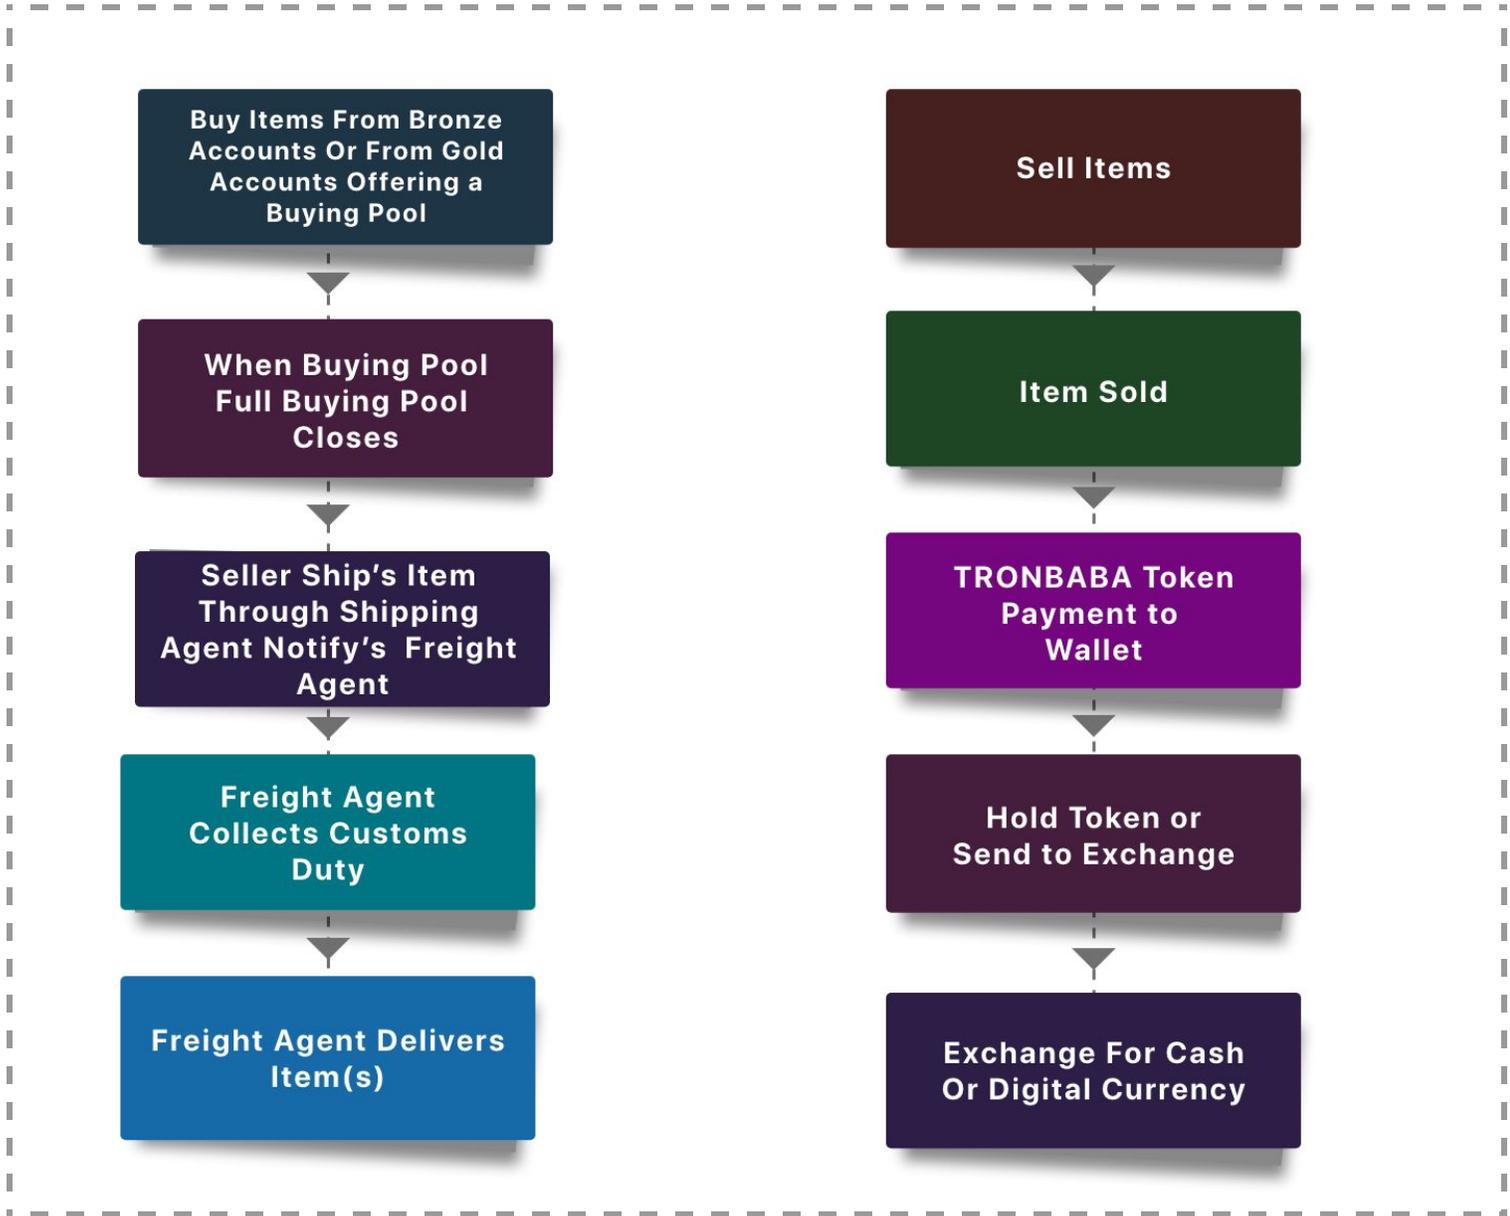

Our current Token is a Tronbaba created Token, using the Tron TRC10 Token system on the tron Blockchain. When soft cap is achieved Tronbaba will fork to use a TRC20 Token. The TRC20 token will enable Tronbaba, to create smart contracts for use on the Tronbaba platform. The trc10 token will be exchanged 1:1 after the Tronbaba Fork.

## 8: Tronbaba.com Future in E-Commerce

There is a number of Global online selling platforms, and none are Decentralized or have a platform that has a usage case for Global B2B, P2P, and B2P on a Decentralized platform. A few sites charge insertion fees to place an item for sale and have a complicated listing methodology that seems to be constantly changing for the worse, making it difficult to list simple items.

When selling on other sites your are not only charged by the sites outrageous fees, you are also charged by either Paypal, Escrow or another form of merchant fee. making it even more difficult to make clear profits.

A few of these sites also charge a final Value fee making your product to expensive, and when your product doesn't sell that month again you are charged another insertion fee. Tronbaba does not charge an insertion fee and goods offered for sale remain for sale until sold, or until the add is removed by the seller.

Our database will be built in a way as to not hinder listing, built in a way that is very straightforward for aiding in the listing of items. The platform will be easy to navigate use & understand. A built in mechanism to protect buyers and sellers alike, and a personal built in wallet to store your tokens once your items sell. The added ability of being able to make profit from selling your product and holding your Tokens a personal secure wallet

## 9: How does Tronbaba make profit?

Site Fees:

2% Transaction fee on all sales,

1% Transaction fee on Token purchases,

Various Banner advertisement fees for both members stores and outside web sites,

Bronze Transaction fees

Silver Annual Membership & Transaction fees.

Gold Annual Membership & Transaction fees,

Platinum Annual membership & Transaction fees

Services insertion fee, and Transaction fees

SA & FA shipping Agent's And courier Membership fee & Transaction fee's

All fees and membership transactions are to cover network Costs, Setup, and daily running of the Tronbaba Blockchain, this will include any future development of the Tronbaba Network.

## 10: TOKEN SYSTEM

Using the Tron Network, we developed our tokens to operate as replacements for other intermediaries. TRONBABA TOKENS will be the fuel that powers the TRONBABA platform.

The token will be an integral part of the ecosystem as the preferred method of transaction. Since our tokens will be of the standardized TRC20 format when Tronbaba Fork is activated, they will simply be integrated by others who wish to display them. The code will be available to the public for transparency. Through the tron block-chain, all transactions and transfers are performed autonomously with superior transparency and complete decentralization.

The primary objective of the token creations is to allow supporters of the TRONBABA vision an incentive to contribute to the TRONBABA ecosystem and this is the key backbone of our Marketplace where all transactions will be happening through TRONBABA Tokens.

Tronbaba Tokens will also be rewarded to users that achieve a Seller or buyer standard set out by the Tronbaba team, and can be exchanged for goods or services on the Tronbaba Platform

## 11. TRONBABA Road Map

Q1 ICO Website Launch

Bounties Telegram, Twitter, Facebook, Signatures, Translations

Q2: ICO Completion, Web Site initiation & Build, Wallet Creation, TRC20 Creation, Location of Premises, Network Installation, Exchange listings, Acquire Vehicles, SA & FA Applications for Shipping, Freight, Courier and Drop Shop Agents, Shipping Label Creation. Smart contracts creation.

Q3:Tronbaba Shipping Activation & interface build, Country Sector Map Creations, Scan for tokens Application creation, Continuation of Web site build and integrate shipping App.

Q4:Services build with Integrated Calendar interface, Continuation of website build.
